The Bulletin of the Center for Children's Books:

"Fostered by Freya, pages crowd with rousing fellowship as well as period-accurate but fantastically amplified clothing, replete with bristly beards and braids spilling from under helmets and over tartans. For mini-medievalists looking to trade in...Bethan Woollvin's *Three Little Vikings* for another adventure, Freya's story will be worth sharing." [Recommended Title, Jan 2025]
